QRD: This thread is about US DoD funded biolabs in Ukraine, Georgia, and other countries that have permission to do pathogenic research. The scientists also have diplomatic protections. These biolabs are on the borders of Russia, and also all over Africa.

Putin addressed this in 2018 in an interview that talked about US Air Force collecting sinovial tissue RNA samples from Russians of caucasian looks, excluding Ukrainians specifically. Watch the video in OP at listed time stamps.

Sars-Cov2 is proven to be a genetically targeted virus <https://archive.ph/8mnyl> & <https://archive.ph/v80in> , Ashkenazi Jews barely catch it. Sars-Cov2 variants can be made to target other ethnicities in the lab, it has a large envelop for much RNA customization. The supporting evidence is below

US Official narrative is setting up a false flag narrative against Russia

<https://thebulletin.org/2022/02/us-official-russian-invasion-of-ukraine-risks-release-of-dangerous-pathogens/>

Robert Kadlec, Assistant Secretary at the US Department of Health, categorically denied the existence of an American bio-weapons program at a seminar on the threat of biological and chemical weapons. The event was organized by the European Parliament on 7th March in Brussels. Asked why the information about the US military bio-laboratories in 25 countries bordering on Russia, China and Iran (the Pentagon's main rivals) is classified, Kadlec responded: "They are not classified, they are openly available to anyone who wants to look"
