Caution! Some images NOT suitable for work (NSFW – crude language or imagery). Please use discretion when selecting appropriate collateral for your Op.

Searching: Image filenames contain human-readable, machine-searchable keywords. After downloading, search local filenames by topic. Searching across multiple folders often produces more results.
Size/Shape: Image shape matters, especially on Twitter. Many images are available in two shapes. Best shape for Twitter is landscape, 16:9 or 2:1. Twitter timeline view truncates the top of square images. However, square images display well on Instagram, 4chan, and 8kun.
