

ScytI Helping organizations around the globe improve **participatory democracy, citizen empowerment and public transparency** via innovative technology that covers the **election cycle** from **end-to-end**.

Pre-Election
ScytI's solutions assist election administrators with the planning, organizing and training activities that accelerate as each new Election Day approaches. From tracking campaign contributions, training poll workers, registering voters and delivering eBallots to overseas and military voters, ScytI provides efficiencies for elections and the officials that conduct them.

Election Day
During Election Day, the most critical period of the election cycle, election officials can rest assured that robust and user-friendly tools are being utilized both by election administrators and voters. Whether in person or remotely, voters will experience a state-of-the-art web interface to answer questions and cast their vote.

Post-Election
After Election Day, work is far from over. This is where some of the most important steps take place to ensure accuracy and effectiveness of the voting system, aggregate and present election results for public consumption and use the information learned from this election to make the next one even better.

REALIZING THE BENEFITS OF END-TO-END ELECTION MODERNIZATION

REALIZING THE BENEFITS OF END-TO-END ELECTION MODERNIZATION

Scytl election modernization provides a full **end-to-end** solution for secure electoral processes, election staff and voter management.

Our **end-to-end platform** covers the full election cycle from **Pre-Election, to Election Day to Post-Election** with tailored functionality associated to the tasks required in each cycle. The benefits of a full solution ensure complete election management functionality with no gaps left untended to, simplified management and support, improved data integration and maximum election **accessibility, security, transparency and auditability**.

Scytl/ Poll Worker Management

Provides electoral authorities an election specific solution that significantly improves efficiencies in staffing, training, management and productivity of large temporary poll worker staff, greatly reducing election operational risks.

1 / Predictive staffing and efficient hiring

2 / Centralized training requirements and scheduling

3 / Staff coordination and assessment

Scytl/ Election Training

A fully customizable online election staff training solution that ensures the delivery of flawless elections by providing your staff with the detailed knowledge they require before and on election day via engaging, comprehensive and effective interactive learning available from nearly any Internet-connected device.

1 / Training scoping and course creation

2 / Online training publication, management and refresh

3 / Post training cycle evaluation

Scytl/ ePollBook

Transforms the traditional electronic poll book concept into a comprehensive precinct management system. In addition to expediting voter check-in and verification, Scytl ePollBook provides election officials with centralized management and real-time visibility into elections as they unfold.

1 / Poll book set-up and voter data input

2 / Voter list management and voter information updates

3 / Dashboards with full election visibility and reports

END-TO-END ELECTION MODERNIZATION

Scytl/ Online Voting

Enables voters to securely and easily cast their vote from any location and on any device with Internet access, enfranchising all voters, including persons with disabilities, illiterate and remote voters, while ensuring voter privacy and election integrity via a unique security and verifiability framework, all while reducing overall election costs.

1 / Accessible secure voting from anywhere and on any device

2 / Secure ballot box and end-to-end encryption

3 / Voting receipts for full verifiability and transparency

Scytl/ Results Consolidation

Securely collects and aggregates data electronically from all polling places in an election. With Scytl's consolidation solution, thousands of election staff can update the results from the precincts in a short period of time, speeding up the counting and tabulation process, consolidating the results from different voting channels quickly and accurately, and publishing results in hours rather than days.

1 / Tabulation, digitalization and counting (manual, digital, ICR scan, etc.)

2 / Compilation and validation, consistency checks

3 / Tallying via electoral commission election keys

Scytl/ Election Night Reporting

Provides election officials and citizens with reliable real-time online visualization of electoral results through a secure, efficient, user friendly and intuitive graphical interface supported by a scalable infrastructure ensuring no downtime during critical periods of peak usage.

1 / Definition and configuration of reporting requirements

2 / Preparation and transmission of validated data in real-time

3 / Scalable results publication and visualization
