

BIG HOMO BOMB REPORT - ASCII ANALYST EDITION Prepared for the discerning connoisseur of sphinctural markets. Forecasts based on fabricated data, unreliable witnesses, and deeply suspect motives.

Chapter 1: Market Analysis of Rainbow Sentiment

In Q1 of our homo-economic outlook, the so-called 'rainbow' represents a sardonic arc of irony, bowing under the weight of its own smug chromatic delusions. Analysts report increased volatility in sphinctural derivatives, especially where peanut butter futures intersect with public closet denial indexes.

Conclusion: Probability of spontaneous glitter detonation exceeds 23%, requiring hedges in both lubricant reserves and discreet monocle polishing.
