Elite Pedophile Ring

The Pedogate scandal first came to light when Hillary Clinton's campaign chair, John Podesta's emails were leaked to WikiLeaks by DNC staffer Seth Rich.

Seth Rich was shot dead near his home in Washington D.C. shortly after the emails were passed over to the whistleblowing organization and many now believe that this was the reason he was murdered.

Seth Rich's death was officially recorded as a "robbery gone wrong", but with recent revelations about him being the leak of the emails, truthers everywhere are demanding for the investigation into his death to be reopened.

The emails revealed mass corruption and criminality as well as a connection to a Washington D.C pedophile ring.

The email conversations appeared to use known food-based pedophilia code words that seemed completely out of context until crowd-sourced investigations exposed their true meaning.

John Podesta has denied the allegations of his connection to child trafficking, but has never explained the contents of the emails or offered an alternate meaning to the code words.

The Rothschild Dynasty

According to conspiracies.net, the Rothschild family has amassed a family fortune estimated to be \$500 trillion and that's a low estimation.

They are so powerful that they have a family coat of arms that is recognized internationally.

In addition to that, Sir Evelyn de Rothschild is the personal financial adviser to the Queen of England.

Some people say that this fortune was built using unscrupulous means.

The Rothschild family are known to have funded the losers and the winners of all wars since the Napoleonic Wars of 1803 to 1815. They fund both sides so that whichever side wins, they profit. In 1815, Napoleon Bonaparte was campaigning to take over Britain itself. Seeing an opportunity, the Rothschild family got together and made a plan. Jacob

Rothschild was stationed in Paris, France. He was told to fund Napoleon's war effort to conquer Britain. On the other hand, Nathan Rothschild, stationed in London was told to fund General Wellington's war effort against Napoleon. The two sons did that and the war raged. Soon, the family decided that it was more profitable to them if Britain won the war and the British royal family was indebted to the Rothschild family. Thus, Jacob limited the funds to Napoleon's army and General Wellington began to win.

The original founder of the Rothschild family; *Mayer Amschel Rothschild* personally dictated that the female descendants of the family were not to receive any direct inheritance. This meant that a Rothschild lady could not inherit wealth from her father or mother. As soon as they reached the age at which they should marry, they were disconnected from the family wealth so that they had to figure out a way to fend for themselves. This was an indirect way to ensure that these girls married back into the Rothschild family. Having lived like princesses all their lives, it made more sense to marry their cousins, inherit the wealth of their new husbands and then continue to live like royals. Thus, for over 200 years, the Rothschild family have intermarried among themselves. This is officially known as avunculate marriage. It is where an uncle can marry a niece and an aunt can marry their nephew. Nathan Rothschild married his brother Carl's eldest daughter.
