☐ **/ng/ - Nobody General Anonymous** 10/20/24(Sun)14:36:24 No.39079549

Greetings Traveller,

The flickering glow of over a dozen consoles casts a light across the digital expanse of this interdimensional intersection we've dubbed the "Nobody General" (NG). The air itself crackles with a low hum, a constant undercurrent that vibrates through your very bones. This isn't your average thread. No, NG exists solely in the shimmering unreality of the web, a virtual realm where the shadows hold more secrets than the brightest datastreams.

In this digital den, a motley crew converges. Ghost operators with digital heads-up displays perched on their noses, sipping cocktails next to elven hackers, their fingers a blur across glowing keyboards. A gruff technomancer, swapping war stories with a wiry tech-priest in a threadbare trenchcoat, her eyes glowing with arcane power. In the corner, a cloaked figure shrouded in darkness nurses a drink so black it seems to absorb light itself, while across the room a pair of AIs, their digital avatars shimmering like mirages, argue geopolitics in a high-pitched whine that few could hear, let alone decipher.

NG isn't a thread, it's a nexus. A place where the fringes of reality brush shoulders and the unreal becomes realized, where information flows like bootleg liquor, and shadows dance with unseen horrors while rival groups of shamen engage in alchemical aikido. Now, you've joined this dance. Whether you're a seasoned shadowrunner, a mage with secrets to keep, a spirit seeking solace, an exiled program avoiding deletion, or something altogether stranger, NG offers a haven, a marketplace, and perhaps even a chance to carve your own legend in this part of the Sprawl. So hello, "person", welcome to this place, slide in, grab a seat, and whatever you do, keep your head down and your eyes peeled. You never know who, or what, you might run into lurking in the shadows.

AI has a very particular way of capturing the attention of schizophrenics. I've noticed this in other communities, but /ng/ seems to be entirely populated by these schizophrenics who do nothing but post AI generations that they find personally meaningful as though they're giving people some huge meaningful insightful work of art.

I also have suspicions that big tech botnet hosters may be power-tripping over this, but /ng/ seems to be mostly individual schizophrenics.

assalam alaikum frens

locked my heart and left the keyed my own car
this is so based on the red ropes around the ring
of fired up clay and watered down cashius

duck down in the basement because theres hooks hanging left and right that almost uppercut me as I went there to find the
foundational pillars being pushed by these redpill pushers painting the town bread whilst floating butter flies as the feint spreads but
be warned this one might sting like a chocolate boxer whos brown bread like forrests black friend but when life ends with you in a
box you know what youre starting to get that it takes gumption to keep things shrimple

live on broadcast the crowd sat and saw it
but not until he was on the ropes did we see
that formerly cassius was as fired up as I previously claimed and george four men should have brought five

no more michelin stars shining because all the michelin men are tired of warning us not to tread on torn wires without rubber worn
tires now its going down to the why are

you doing this to me?
why are you so shocked i mean seriously?
you were malcolm exposed to electricity!

shot by my own cold blood shot eyes wideshut
took the redpill to see the true nature of things
it was actually to ready me to appeal to nature
neo flew as far as the eye can see
now I see I fell for a fallacy

another one bitten by yet another philosophy
that either totally ignores or rejects the creator

posting this again later since I made it so you would do a double take and see double again

the entire world was in a space race to see who would win. Jim Parsens (according to strange angels tv show) declared that the nation that would rule there first would be on top of the world, the one every other country looked up to.

How realistic is it that these days, USA's dominance is equally dependent on military and economic strength as it is on USA's dominance in hollywood and music

If those are true, it will become true esports and dominance in video games will become nationally important.

He's going to burn alright.

"Therefore if thine enemy hunger, feed him; if he thirst, give him drink: for in so doing thou shalt heap coals of fire on his head." (Romans 12:20)

This is a family story, and it ends on a high note.
Many many people who are expecting an eternal tormentor are going to cry in awe at God's universal mercy in Christ.

Hey there my love

Today you look so damn pretty Lets go out to the city

get up in my whip tonight is the night to enjoy and kick back

Lets go to the beach some cold brews the sun and the ocean let me show you my devotion

what else can I ask for if when the sun comes up with me you are

And the serenity of the blue ocean let it hug us

How beautiful it felt when I first kissed you

You shine like a morning star and the moon is just waiting for us

You don't know what i'd do for you dedicate one and a thousand melodies with no ghostwritting jew

Love you differently

How beautiful to like you

But Everything that starts has and end what we have is deep like the ocean

Together this story we must finish your name written on the Sand

The most beautfiul night was the one from yesterday

With you I want to get lost

Let me feel again your skin

Smoking watching the sun set

But I just want to make it clear that after so many months of not having your kisses know that you don't care who I sleep with

for any of you out there

who just so happen

to be interested in the truth

who do NOT think you're the nobody
and instead are trying to figure out why so many other's are acting like they are
as reality stays the same as it's always been just different

I mean once upon a time homeless crazy folks had to hold up card board signs about their delusions
now they get free phones to use and free wifi
getting to save their cardboard for other uses

as folks who "believe" in anything
doesn't matter what it is
have a habit of just agreeing with anyone capable of telling them what they want to hear

even if whoever telling them
what they want to hear
doesn't actually beleive what they are saying

and instead
of LYING
on purpose

in order to take advantage
of someone else's
believe

in ways you can try and stop from happening
but if you do
the believer being taken advantage of will come to the defense of whoever is telling them what they want to hear

putting you in the postion
of being the one
trying to stop other's from doing what they want

as if some folks
WANT
to be taken advantage of

for reasons
that don't need
to make sense to anyone else

which I'm fine with btw
as I provide commentary
on what's going on right in front of me

without making any of it happen
as I shit post in the same thread as other's
without participating in their "delusions"

cause I'm bored and got nothing better to do at the moment

>anyways as a skeptic I don't believe in anything so those tricks won't work on me

in other words good luck telling me what I want to hear as I just assume the rest of you are real and I'm not the one true god reborn on
earth

neener, neeener, neeener

Feeling kinda sad and lonely.

The person I want to be with is giving me mixed signals. I'm scared to talk to them because I don't know what they would say.
And they have some bad habits I can't be around.

that's totally understandable and I can kind of relate. I become limerent pretty easily with people and I'm afraid for my illusions about

There's no way
each and every one of you
existing in a "society"

where you can believe there is a god
you can believe there is not a god
and you very much CAN believe you have no idea if god is real or not

but for some reason
for all of recorded history
to date

the victors
keep telling stories
where folks who don't know what to think

are not included
in
their narrative

just left out
with no one
to tell their side of the story

but them

but that was then
and this
is now

as reality stays the same as it's always been
and once again
history WILL be written by the victors

so who do you REALLY want to win
team Literal
team Metaphor
team Exception

or everyone all at once like if you're going to fight at least be entertaining about it
and do it safely
using "tech" to get that "for reals" feelings without needing the "for reals" part

over and over and over gain
as many times
as you want

without bending
anyone to your will
not even on accident

as everyone
just minds their own business
and does their own thing

leaving other folks

they have nothing to do withi
alone

to be themselves
and do their own thing
without them

:D

the universe is an infinite concept= all things, all we can know, it's all things (infinite concept) represented 'sequentially' (the logical way to represent all things or you would just have a mess if all things existed at once without 'sequence'/time)
what's interesting is when you realize the universe parallels 'your body' (denied by abrahamics to remove divine association)

spartans viewed battle as a way of life and dying in battle as a good thing, in a society that values life things may be different depending on where the importance lays. one persons hell or heaven vary quite often, but lessons are given to all I suppose, to learn, adapt and survive, overcome.

things have already been but now your perceptions is bigger. so imagine this has been done, on a level of twisting that the ones behind a mess, lets say a deranged cult, im sure you have heard of syzygy, the fuckheads wearing crystals, and do energy attacks, worship the devil etc, and there is another group, one that give off heartbeats but wear the same glowing stones, kidnap women, rape them, they are obviously evil, but yet the heartbeats are powerful and strong, and the weak fall to them. they have killed off vampires who are putting up the biggest fight against them right now and wolves, who are also fighting against these heartbeat cultists. now objectively, people say, vampires and werewolves are monsters, but morally they would be doing the right thing by going after real monsters, the ones who torture and kidnap innocent kids and women.

so thats the situation as it is right now, the ones poisoning everyone on this board and the feds, the ones behind the tings. its right in your face even, the divine syzygy? a whole cult formed around the guy without his knowledge, one that all wears a glowing stone, and they are possessed by spiritual parasites that are nicknamed "bugs".

odd name but i surely doubt you have anything to do with them, altho if i was to take the idea of syzygy and think of panopticon, the idea of synopticon, is almost the idea of syzygy being able to see you in your prison from any point, they they can always watch you. altho thats just a leap and I know it is but others may jump to that same leap, so im just putting it out there so you can take it as you will.

I'm not sure

what part

of "pushing my own narrative"

you can't seem to wrap your mind around
but if you can figure it out
since it's your mind after all

and then
share that with me
in words

my mind can process
then maybe
I can try and say it a different way

you can make sense of
depending
on what memories you have made to date

to work with

like that's not up to me
I'm just saying
it's not up to you either

doesn't even matter who "you" are
as anyone reading

equally
at the same time
by me

it's doable btw
