Maricopa County Recorder's Office

2020 Maricopa County Election Review and Cover-Up Evidence Precedes Proof. When they say there is 'no proof' they mean no court victory in favor of

overturning results. There is however plenty of evidence across all 50 states of election manipulation and theft. Having evidence means you still have to build a court case, that is precisely why a judge on Feb 26thallowed for the Arizona Senate to proceed in their audt and MCBOS was ordered to hand over equipment and ballots for a full forensic audit. A week later a fire at Hickman farms engulfed 2 farms, 165k Maricopa County Board of Supervisors chickens and a truckloads worth of missing ballots. This is there attempted cover up

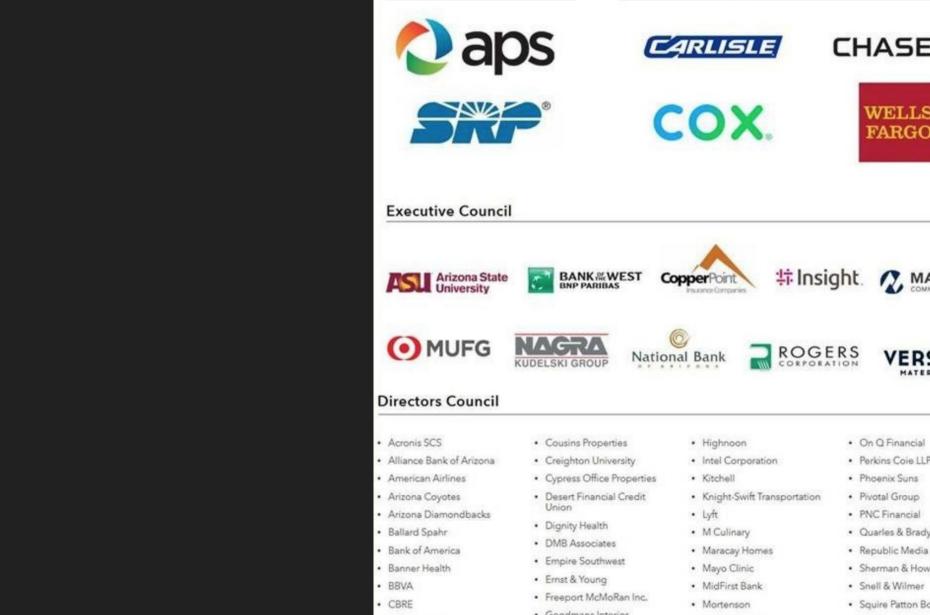

> Slow wash margins: the intentional manipulation of the vote to give a resemblance to a natural swing in voter demographics, by only claiming margin victories as a primer for an entrenched community-opposed political board. Common myths include 'From all the people leaving California' 1. Why would they escape to a tax refuge, and vote for the failed policies. 2. If Arizona gained 1 million

new people, why didn't they gain a new seat?

57,734 ballots with serious issues were identified in the audit. These issues include improper voter registration, improper votes, and discrepancies in the registration. This is a conservative estimate, as there were other identified problems that were not quantified nor included in that total, likely resulting in a much larger number of flawed ballots. Additional issues identified: backdated registrations, multiple voter registrations linked to the same voter affidavit, voters without records in a commercial database, and printing defects rendering thousands of ballots as suspicious.

Sheriffs Office

"In the 2020 presidential election, the margin of victory was only 10,457 votes, a small fraction of the 57,734 ballots with known issues. Again, this is almost 6 times the margin of victory in the Presidential race and is multiples of the margin of victory in other races. Based on these factual findings, the election should not be certified, and the reported results are not reliable."

13,239 Fed Only Votes in Marciopa, 21,549 In Arizona. More than Biden's 10,457 'win' margin Fed Only votes don't need to be registered with an address and can only vote for the federal elections. (Presidential, not local senate)

Ballot Spikes and Leveling out

The mail in ballot drop "from the blue stronghold cities" might sound entirely plausible, but the truth is it highly contestable with several simple notes to notice. Upon 'the drop' the ballots ran in batches nearly 80/20 for Biden for a short plateau of high processing (phantom) votes. The moment Biden takes the deemed lead, which was thin margins in 6 of the contested states, the vote counts maintain near even 50/50 splits of vote counting the same batches of 'end counted mail in votes'. until the 13th of November for the counting to be declared settled.

Pro V&V and ESS (also operates roughly 25% of voting machines nationwide) Abiding by the bureaucratic Elections Assistance Commission ESS also audits themself. " Knowing this, the Maricopa Board of Supervisors likely wasn't after an accurate account of election results, they were after an auditor and limited-scope audit process that will validate THEIR election results."

> Maricopa County Led Audit Only counted 47k ballots. Out of 3.387M Audits deliberately designed to not find acts of wrong doing. Audit is deliberately has miniscule standards to achieve passing approval/certification.
