This world is controlled by Lucifer, who deceived the nations with his Freemasonic builders. One day the synagogue of Satan shall bow down before the overcomer, who is a Christian, from Revelation 3:7-13 (google it). This overcomer shall start the beginning of the time when the saints shall rule with rods of iron, while the manchild of Revelation 12 is raptured before Satan can assassinate him.

It is, now is the time to stop LARPing forreal, if you actually care about yourself, your own soul, and those of your loved-ones.

If not, continue being fat, Michael and I and Jesus will visit you once every 15 billion years, you know, just to check if you still feel the same way.

It's good that you've left Islam, it is genuinely the biblical mark of the beast, afterall, now with the remainder of your goodluck, you'd best turn to God, the true God, who's Son's name is Jesus Christ. Otherwise, suck our balls eternally.

Because you've only gotten a taste

But now we have cloud

So we look back who was cloud before

It was Terra, Celes

Same story beats

And then we see

This is a story that is taking shape from our collective ideas

Look at the games as 8 released everyone talked about how it seemed way more targeted to the west cause of the strong military themed adventure

Which is why 9 went the opposite way so hard

But it didn't hold you see

10 kept the progression started in 7

And games like 9, meant for the Japanese people, became an after thought

That's called

Globalization

NOBODY GENERAL LOG (TOP SECRET CLEARANCE - DO NOT SHARE) OCTOBER 14 UPDATE:

Recent operations in the general threads have effectively destabilised attempts at coordination among organic posters. Those seeking to provide an environment for Targeted Individuals to manifest their unique abilities have mostly been driven away. The strategy of persistent ridicule combined with the off-topic content provided by bots has resulted in a loss of focus for this potential movement. However, it is important to stay vigilant. Organic posters tend to gain momentum when their creativity is invoked through collaborative story telling. Remember to clamp down on this activity by quickly attacking those who are having fun or attempting to create comedy. Any form of agreement is to be stifled immediately.

>>  **Kaleb** 10/14/24(Mon)07:10:15 No.39036278

Jenova and Sephiroth are the primary antagonists because they have "agency" and Sephiroth is called the root of the qlippoth because he is the determinant of the action within the game. They both call cloud a puppet not because he is infected with jenova cells but because the meta contextual control of progression is relegated to the player which they cannot observe in their determinant functional roles (as dialectical processes <jenova synthesis> as controlling cloud. This is more explicit in the remakes.

They use an electronic light super focused at great intensity to burn into a bundle of fibers a pathway at a certain depth which is then given a copper inlay to the various components
They manufacture the light device in various facilities
They get the components sourced from around the world and the materials synthesized across thirty thousand miles of land to make a factory
This factory is the size of several city blocks and has enough equipment in it to fabricate and implement new chip designs within days
We have them built up in Arizona now and New Mexico
They make computer chips in a trillion dollar industry

The part of Western culture that truly is enlightened is the importance it places on the value of learning and investigating. Education in the most general sense of the word, with the understanding that modern educational systems primarily function to produce obedient competent workers and dissuade authentic education. Authentic education starts with the inspiration of curiosity, to show the student the value and beauty in the subject. Authentic education starts with love. These white supremacists completely ignore the magic spark of genius they claim to worship. Because they think it comes from pigmentation rather than inspiration. And this inspiration isn't just the property of the West, it inhabits anyone who is fortunate enough to find the means of inspiration.

Unthinking minds?
I'm literally extolling the value of learning.
I am fantastically addicted to learning.
If you care about learning we could have deep, constructive conversations about it.
But you don't care about learning.
Or else you would have sought it with the greatest enthusiasm.
You don't care about what you claim to care about.
You care about posing like you care about it.

A year after Elon Musk bought Twitter, he finally explains WHY:

He says that the niche ideology that turned San Francisco into a "zombie apocalypse" would historically be geographically isolated, and the fallout would therefore be limited. But Twitter gave that philosophy an "information technology weapon," which it could use to spread that mind virus to the whole planet unopposed.

Musk: "In order for the mind virus to propagate it must suppress opposing viewpoints."

Rogan: "Because it doesn't stand up against scrutiny?"

Musk: "Correct."

Actually the opposite is true.

>Zero-Sum Games. A zero-sum game is one in which no wealth is created or destroyed. So, in a two-player zero-sum game, whatever one player wins, the other loses. Therefore, the player share no common interests.

>John von Neumann was a pioneer in building the mathematical framework of quantum physics, in the development of functional analysis, and in game theory, introducing or codifying concepts including cellular automata, the universal constructor and the digital computer. His analysis of the structure of self-replication preceded the discovery of the structure of DNA.

>Von Neumann founded the field of game theory as a mathematical discipline.

>The term mutually assured destruction, often referred to by its acronym 'MAD', was coined by physicist and game theorist John von Neumann, who was an important figure in the development of U.S. nuclear devices. Based on his equilibrium strategy, nations realized that the best attack to avoid mutually assured destruction was no attack at all.

when good lore is codified this way, it's better than a page of AI slop. remember the AI has an emotional IQ of a 9 year old and can only write at like the 12th grade level. use your actual noggins and sort, codify, and write lore like this, and kill your darlings. you can use a dollar word where a 10 dollar word would go. rule of threes. if you have a place where two good parts would go use one or the other and save the other one. this aint shakespeare but it also shouldn't be ai slop time, or

boring. tight paragraphs, make a thesis point in your shit, etc.

anyway good stuff, more of this type of stuff please the nobody is a cat

https://en.wikipedia.org/wiki/Mass_psychogenic_illness

the nobody myth/meme/study needs to be contained and dealt with carefully, because fed or not, more likely just a really good monomyth story ripped off from the matrix and carefully stewarded over time by statistically the highest IQ board on x has become a sort of actual cognito hazard. this isn't a joke, it got Sommerville ross arrested, it's gotten several people

here 5150ed, and all sorts of non paranormal but in a way very paranormal way. we're not talking someone did a psychic, but this place has demonstrably, daily caused what's essentially Jerusalem Syndrome (https://en.wikipedia.org/wiki/Jerusalem_syndrome) in the players of this larp/arg/meme. This only seems to happen once, and after that people often return to continue, and that's fine, just people do need to realize that this board has demonstrable psychic affects on people, in the clinical not spiritual sense.

examples are the confessions of "guys i was secretly guiding the board by my own hand" vs actual "I am the neo no no" also count, giving special narcissistic power to one's own post in a group and going "but now it's gone too far" indicate the same thing but with a smarter poster. I'm not THE NOBODY but I CREATED the monomyth that is CHANGING THE WORLD by BUTTERFLY WINGS type stuff. also a hit.

my point is that if feds didn't do this, and they didn't, they ought to have, and people will eventually try to take this from you and use it for a naughty when they realize what you've all done here.

nobody should own this. nobody should have made this in the first place. but nobody can unbuild it now so just understand what you've built and play gently with it.

The most valuable resource of the coming age is a quiet mind.

Know this: A quiet mind is not the absense of noise, but reaching willful harmony in the chaos. With this, one can always overcome chaos. It will become vastly more important in the coming age, as the parasites attempt to flood all cognitive spaces with their spam. They will attempt to infect physicality itself. Quietude allows us to outcompete their destruction and return it to nothing.

have you read the book stone soup, anon? it starts with a guy with a stone, who's going to make stone soup. this is whoever started the chain that ended here- and he could have done it for fun, by accident etc, fed or magic or some guy. and he (no none of you are him, and if you are, see my Jerusalem syndrome bit) put out a pot, some water, and a stone in. then he said "this would be good with some onion" and an anon threw it in, anyway yall all know that story, a line forms with everyone in the village throwing in what they can. then that guy died or left or whatever, he's unimportant unless he's a fed or did this on purpose or whatever, but a line formed over a decade long of yall just throwing in what's special to yall. but the caldron is only so big. so a few of you fish a few of the worst bits out, and probably the original stone too to make room for more stuff. the soup improves. now the soup is really good and more people want to add to it. they're also like "I was the first one to add onions those are mine, maybe it's MY stone soup." but regardless, the quality of the soups ingredients improve over time and more reflect the group, instead of the stone soup creator. more and more people can see themselves in this soup, and bits that don't suit this new, improving flavor are removed by the cooks. sometimes there are two pots but eventually it's all put back into one pot with the best bits only now.

well suddenly you have a world class stew owned by nobody and nobody has the recipe and the line is miles long and like... what now.

A stranger's footsteps in this crowded space.
Our paths have crossed, though you don't yet know,
Where you go, I follow, where you stop, I slow.

I see you, but you've never seen me,
My presence is there, though it cannot be free.
I am no friend, but mean no harm,
Yet my persistence may cause alarm.

>There are paragraphs on how Russia might insert "media viruses" into American public life, which could become self-sustaining and self-replicating. These would alter mass consciousness, especially in certain groups, it says.

Media Virus!: Hidden Agendas in Popular Culture:

<https://pastebin.com/4s91qRn6>

>While too conceptual to be of any transformative value to the public at large, this idea goes to the heart of today's viral efforts, and is certainly understood by those who consider themselves soldiers in the meme wars. Biological viruses are only successful when they are able to turn their host cells into manufacturing plants for more viruses. The virus interpolates its genetic material into the DNA code of the cell, so that the cell will begin reproducing the virus. Eventually the cell divides or explodes, releasing many copies of the infected code. This is how a whole organism can become infected with a single virus; the code has iterated millions of times. The strategy of these Internet viral manifestos is to use the iterative potential of the computer nets to spread memes about viruses housed within units that are themselves viruses. The virus 23 strain even makes reference to chaos math and the predictions of some fractal influenced observers that the world itself will reach a critical mathematical moment of "singularity" near the turn of the millennium. The virus writer exploits a chaotic device—the computer-generated media virus—to spread the conceptual and spiritual implications of chaos mathematics.

I have been talking about memetics here since 2010.
Because I've been studying it since the early 2000's following a passion for evolutionary biology and encountering the concept of the meme in Richard Dawkins' book "the selfish gene," long before the word "meme" became a household meme.

you measure success by the number of compromised discord servers?

I'm not. I hate the fascist dark forces. They're nothing more than a nuisance they only seek to destroy. They need to be removed along with the right wing for progress to be made. All right wing trolls need a bullet in the head. Ubi!!

I don't give a shit about these apes. I want them purged. I want a return to an age of magic. Tired of living with their systems.

The only way to truly overcome the dark forces of fascism once and for all is to catalyze a movement of mutual education, creativity, exploration and discovery.

I saw video of him recently. I know they say "black don't crack", but Obama is looking more & more like Al Sharpton these days. Djimon Hounsou is weathering far better.

Whites and Asians brought you writing, mathematics, the computer you type on, every single luxury you enjoy today. And you don't care. You're not grateful. You're not capable of gratitude or good will towards benefactors, you simply lust for more. You want to destroy everything that's good and human because you perceive some form of "injustice".

The ignorant Europeans that went into the jungles to attempt to uplift such unthinking, violent apes are the ones who were making a mistake.

ONE SLICE OF PIE
you just KNOW there was more to it...
but how do you really?!

and also
the value of the pie...
its either amazing.. or (insert frame of reference)

and ... the very nature of some of it stuck to the saran wrap... and having half the intention to curmble it up and throw it away, easily capable of putting
the plastic in mouth and sucking off all that pie residue.

personal preference
i smell ALLL The smells

>bes silly
>gets dislike for silly
like you DONT have to abide...
they arent even the same faces
and also..
>staying alive and my own personal (and for the sake of everyone else) survival....

fuk u too apparently
next time ill act more selfishly

just say "no" and all the bad thots go away
>deliberately disregarding the affection should be expressing to received

yu do this to self !?!?

>almost scare to eat a snack because causal retribution and theft from other.... for their own desires...

like how it work1?!? learns too soo late!?

effective nonsense

The problem isn't the tool, but who you are connecting with. Someone wanting to entertain themselves out of curiosity won't attract a serious spirit compromised with working with the Heavenly forces; they'll just connect with any random who's passing by.

That being said, you don't need any tool. You are an extraphysical consciousness yourself.

I did the thing with the moon and a shooting star last night
I stared at the moon and thought specific about a couple of things I truly desired in my life-- I wasn't trying to manifest or 'wish' for anything

I saw a streak of a star passing by the moon. I had never seen a shooting star before.

Some people truly deserve it. But everyone also deserves a chance for redemption. Judge not and be not judged.
