

Global Future 2045

New York, June 15-16, 2013

The second international Global Future 2045 congress focused on discussion of a new evolutionary strategy for humanity aimed at overcoming the 21st century's civilization challenges.

\$10 million XPRIZE Aims for Robot Avatars That Let You See, Hear, and Feel by 2021

Ever wished you could be in two places at the same time? The XPRIZE Foundation wants to make that a reality with a \$10 million competition to build robot avatars that can be controlled from at least 100 kilometers away.

Artificial intelligence is going to completely change your life

Just as electricity transformed the way industries functioned in the past century, artificial intelligence — the science of programming cognitive abilities into machines — has the power to substantially change society in the next 100 years. AI is being harnessed to enable such things as home robots, robo-taxis and mental health chatbots to make you feel better.

ROADMAP

Manifesto

Mankind has turned into a consumer society standing at the edge of a total loss of the conceptual guidelines necessary for further evolution. The majority of people are almost exclusively absorbed in merely maintaining their own comfortable lives.

Modern civilization, with its space stations, nuclear submarines, iPhones and Segways cannot save mankind from the limitations in the physical abilities of our bodies, nor from diseases and death.
